**CSS**

**Bootstrap**

**Java**

## Experience

### **BasketHunt Pvt Ltd-web developer intern**

2022 - 2022

written clean & responsive codes and developed websites improved frontend and backend.

## Projects

### **Qpaperz**

This website has a great UI which is used to download the previous years question papers of Bharati Vidyapeeth university college of engineering

Technologies used

HTML to layout webpage

CSS for designing the webpage

Bootstrap to use previously designed layouts

### **Weather forecast**

In this project express.js ejs and nodemon is used. On entering the location this website fetches temperature description of the climate and an icon related to weather using an API. And time at which temperature is measured is generated using javascript.

## Achievements

Successfully led the Information Technology team at my college as the Publicity Team Leader, improving communication and teamwork skills. As a result, I honed my skills and was able to demonstrate my ability to work in a team environment.
