

SUMMARY

Experienced Java Developer building and enhancing enterprise financial applications. Skilled in developing scalable backend systems using Java, Spring Boot, and SQL, with hands-on experience in REST API development, transaction processing, and role-based access control systems. Experienced in Liferay portal development, including custom portlet creation and enterprise application customization.

SKILLS

Programming Languages	Java, Python
Backend & Web	Spring Boot, REST APIs
Database	MySQL, PostgreSQL
Build & CI/CD	Maven, Jenkins
Tools & Platform	Liferay
Developer tools	Cursor, GitHub Copilot
Testing	Selenium

EXPERIENCE

Software Developer – Amdocs

[2023 — Present]

- Designed and enhanced financial transaction processing workflows, ensuring accurate handling of quote and actual transactions with proper counter management.
- Implemented robust business validation logic for transaction processing, including conditional application of pricing rules based on party involvement.
- Worked on enterprise portal development using Liferay, improving internationalization (i18n) and ensuring seamless localization behavior during OSGi module deployments.
- Contributed to modernization of legacy systems by upgrading and aligning Maven-based projects with the latest technology stack, performing dependency analysis and version standardization.
- Developed and maintained RESTful APIs to support core business functionalities and system integrations.
- Built simulator/mock services to replicate third-party API behavior based on BRD requirements, enabling efficient development, testing, and integration in non-production environments.
- Developed dynamic financial reports within a finance management application using Java and SQL, allowing real-time data retrieval and visualization for end-users.
- Automated a complex, manual XML-based role assignment process by developing a Python script, significantly reducing time and human error in updating access control configurations.
- Implemented dynamic UI workflows using Liferay MVC Portlet architecture

EDUCATION

- **Bachelor of Technology in Information Technology** [2019 — 2023]
Bharati Vidyapeeth University College of Engineering (BVUCOE), Pune
CGPA: 9.1/10
Relevant Courses: Software Engineering, Data Structures, Algorithms, Database Management
- **Senior Secondary (12th Grade)** [2017 — 2018]
Kendriya Vidyalaya, Ghaziabad
Percentage: 87%
- **Secondary School (10th Grade)** [2015 — 2026]
Arun Modern Public Senior Secondary School, Delhi
GPA: 9.6 / 10
